

T-MOBILE FOR BUSINESS PARTNER SOLUTION: Hit2Talk – Push Over Cellular

SOLUTION OVERVIEW / BENEFITS

Hit2Talk is a Push-to-Talk (PTT/PoC) solution that enables mobile devices (phone, tablet or LTE connected Walkie-Talkie) the ability to communicate nationally and instantly with a single click. Users can also chat globally with Wi-Fi connected devices.

Hit2Talk's integrated solution application can talk, dispatch, broadcast, GPS track, & so much more. This solution is made to ease the pain-points of wide range communication while offering the flexibility of custom channels and keeping safety in mind. Experience real-time GPS location & tracking with SOS monitoring alongside our dispatch console, providing admin oversight.

Hit2Talk adapts to every industry vertical, making it the most versatile and sought-after solution in the market. Perfect for fleet management, construction, retail, and facilities with a nationwide footprint.

Special Offer: Get 1 Month of Free Protection

Targeted Verticals

- Construction
- Manufacturing
- Education
- Hospitality
- Agriculture
- Transportation
- IT
- Government
- Retail
- Warehouses
- Infrastructure
- Commercial
- Property Management
- Restaurants
- Security Guards
- Healthcare

Qualifying Questions

- What would you like to spend more time on if communication is streamlined?
- Do you find your organization "too late to do anything" about logistical holdups?
- How do you keep your teams and lone workers safe?
- Are work distractions (YouTube on a work phone) an issue?

Why Do We Win

- Nationwide LTE & Wi-Fi for global connectivity
- Easy to Administer
- Instant communication to stay preventative, not reactive, saving time and resources

Pain Points that Hit2Talk Addresses

- Costly, FCC regulated 2-Way radios have limited range
- "Work" phones experience missed calls & long wait times
- Information is everything. Don't be the last to know if all it takes is seconds to defuse
